

MA RAHMAN

Business & Data Analyst

Dubai, UAE | +971545562285 | ✉ rahmandatascience09@gmail.com | 🌐 Portfolio | 🐙 GitHub | 🔗 LinkedIn

Experienced Business & Data Analyst with 3 years of expertise, including 1 year in Dubai, specializing in machine learning, statistical analysis, and workflow automation. Proficient in Python, SQL, and Power BI for building dashboards, tracking KPIs, and CRM analytics. Strong in predictive modeling and uncovering data-driven insights. Skilled at optimizing processes and collaborating cross-functionally to deliver impactful solutions that improve operations, guide strategy, and drive business performance.

CORE SKILLS

Languages/Tools	Python, Power BI, Advanced Excel, R, C++, HTML
Packages	Scikit-learn, TensorFlow, Keras, Pandas, NumPy, Matplotlib, Seaborn, Plotly
Databases	PostgreSQL, MySQL, ETL, Hubble
Framework	Stream lit, Flask, RESTful API
DevOps	GitHub, Azure Cloud, AWS

PROFESSIONAL EXPERINCE

Data Analyst | PDAinfotech | Dubai, UAE

Nov 2024 - Present

- Led the design and deployment of churn prediction, customer lifetime value (CLV), and customer segmentation models for a retail client, improving retention by **18%** and generating AED **150K** in additional quarterly revenue
- Developed and implemented trial-to-paid conversion and churn prediction models for PDAinfotech's SaaS platform, boosting conversion rates by **25%** and reducing churn by **12%**.
- Automated end-to-end reporting pipelines using SQL, Python, and Google Sheets, reducing manual reporting effort by **60%** and delivering real-time business insights.
- Built and maintained interactive dashboards in **Power BI** to track KPIs across sales, marketing, and customer success, enhancing data-driven decision-making.
- Reported directly to the **C-suite** team on daily, weekly, and monthly metrics, providing strategic insights that guided business planning and operational improvements.
- Partnered with cross-functional teams to translate analytics into actionable strategies, optimizing marketing campaigns, sales targeting, and product adoption.
- Improved data quality and governance by designing validation frameworks and standardizing datasets, increasing reporting accuracy and reliability by **30%**.
- Conducted A/B testing and campaign analytics for marketing and product initiatives, enabling data-driven optimization and measurable performance improvements.

Data Science | Ai Variant | Hyderabad, India

June 2023 - Aug 2024

- Conducted sentiment analysis on customer reviews from e-commerce platforms, enhancing classification accuracy by **10%** through extensive feature engineering and model tuning with Python, NLTK, and Scikit learn.
- Analyzed data to uncover insightful patterns, enabling targeted marketing strategies and improved customer satisfaction.

- Developed an automated data scraping tool using Selenium for real-time sentiment analysis, conducting business process analysis to identify critical gaps. Established and presented Key Performance Indicators (KPIs) to management, enabling actionable execution plans and effective monitoring of customer feedback and market trends.
- Created a time series forecasting model for stock prices in NSE and foreign stock markets, collaborating with Black Rock Company. Integrated LSTM, ARIMA, and Prophet models, achieving a **15%** reduction in RMSE and predicting stock trends with **85%** accuracy, thereby facilitating informed investment decisions.
- Designed a predictive model for solar power generation at Cygni Energy Private Limited, achieving an **88%** accuracy rate. This model assisted the company in optimizing resource allocation and reducing operational costs by **6%**, showcasing the impact of data-driven insights on energy management.
- Built a predictive model for bankruptcy prevention using Logistic Regression, Random Forest, and Gradient Boosting, reducing false positives by **18%** and improving overall accuracy by **22%**. This proactive approach helped companies identify at-risk firms earlier, potentially saving millions in financial losses.

Business Analyst | Amazon | Hyderabad, India

May 2022 - May 2023

- Spearheaded the design and implementation of Excel macros, automating seller support and daily operations. Achieved a **10%** increase in process efficiency, significantly reducing manual workload.
- Developed and documented the **SOP** for the transparency project, detailing every step of the process, which enabled team members to easily follow and implement the workflow.
- Improved the transparency process by automating manual tasks using macros, resulting in a **15%** reduction in the time required for daily operations.
- Leveraged Hubble Query Language and ETL processes to extract, transform, and load data, optimizing data flow and enhancing catalog management accuracy.
- Played a key role in the Seller Flex and transparency projects by automating routine processes, minimizing manual intervention, and boosting task precision.
- Partnered with diverse teams to improve seller support systems, fostering a more streamlined and efficient workflow across departments.
- Employed automation tools and data analysis to consistently monitor and enhance cataloging processes, ensuring high standards of data integrity and operational excellence

EDUCATION

GPA: First Class

May 2015 -May 2019

Jawaharlal Nehru Technological University Hyderabad | B. Tech in Mechanical Engineering | Mahabubnagar, Telangana.
